Supernovae Supernova Remnants and Young Earth Creationism FAQ

July 9th, 2001 - Young Earth Creationists claim that there are not enough observed supernova remnants for the universe to be billions of years old This article debunks

Supernova Wikipedia

January 17th, 2019 - A supernova is an event in which a star or other celestial body undergoes a violent explosion or ejection of its outer layers. The event is often accompanied by a brightening of the star, and the resulting supernova remnant (SNR) is a cloud of gas and dust that expands outwards. The term "supernova" is also used to describe the event itself, and the plural "supernovae" is used to describe multiple such events. The abbreviations SN and SNe are used to refer to a single event and a group of events, respectively.
